PROFESSIONAL SUMMARY

Computer Science & Engineering student focused on AI/ML, with hands-on experience in machine learning, RAG/LLM applications, data analysis, and Python development. Experienced in building ML pipelines using Scikit-learn, Pandas, and NumPy, and developing practical AI applications with FastAPI, React, ChromaDB, and Ollama. Strong academic record with a CGPA of 8.93.

SKILLS

Languages: Python, Java, C, JavaScript

Frameworks & Libraries: FastAPI, React, Pandas, NumPy, Matplotlib, Scikit-learn

AI/ML Specialization: Machine Learning, Deep Learning, LLMs, RAG, Data Analysis, Data Preprocessing, Feature Engineering, Model Evaluation, Data Visualization, Image Processing

AI & Developer Tools: ChromaDB, Ollama, Git, GitHub, VS Code

PROFESSIONAL EXPERIENCE

Machine Learning Intern

Axcentra (Virtual Internship) | May 2026 – Jun 2026 (1 Month)

- Performed data preprocessing and feature engineering on real-world datasets to prepare inputs for ML pipelines.
- Conducted exploratory data analysis (EDA) using Pandas and Matplotlib to identify patterns, distributions, and data quality issues.
- Implemented and evaluated Logistic Regression, Decision Tree, and Random Forest classification models using Scikit-learn.
- Completed end-to-end ML assignments covering data preprocessing, model development, and evaluation.

PROJECTS

AI Placement Assistant | RAG + LLM

Python, FastAPI, React, ChromaDB, Ollama, Llama 3.2 | Ongoing

- Building a RAG-based AI placement assistant using resume and job-description context to provide relevant placement guidance.
- Developing a FastAPI backend with ChromaDB and Ollama for document retrieval and LLM-based response generation.
- Implementing resume skill-gap analysis against job descriptions to identify relevant learning areas.
- Developing a React interface for personalized interview-question practice and feedback.

Early Pest Infestation Detection System

Machine Learning, YOLOv8, FastAPI, React, Image Processing, Python | Feb 2026 – Present | Final-Year Engineering Project

- Developing an image-based system for early detection and classification of grape leaf diseases and pest infestations.
- Using YOLOv8 classification for prediction and FastAPI for model inference and backend services.
- Designing a React interface for image submission, prediction results, and detection history.
- Implementing management guidance based on detected disease or pest classes.
- Building a dashboard to track detection history and infestation patterns.

Water Quality Prediction

Python, Scikit-learn, Pandas, Random Forest | Mar 2026

- Built a Random Forest classifier achieving 67% accuracy on the Water Potability dataset to predict whether water is safe for consumption.
- Performed data preprocessing including null-value handling and feature preparation, and compared multiple classification approaches.

Python Playground – Interactive Learning Platform

Python, JavaScript, Animations | Apr 2026 – Present

- Developing an interactive platform that helps beginners learn Python through visualizations of variables, loops, functions, and recursion.
- Designing step-by-step visual walkthroughs to make program flow and memory concepts easier to understand.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science & Engineering

Secab Institute of Engineering and Technology, Vijayapura | 2023 – 2027 | CGPA: 8.93

Pre-University Course (PUC), Science

Secab PU College, Vijayapura | 2023 | Score: 94%

Secondary School Leaving Certificate (SSLC)

Secab Chand Bibi Urdu Girls High School, Vijayapura | 2021 | Score: 87.2%

ACCOMPLISHMENTS & AWARDS

- Selected among the top 25 teams out of 61 teams for Round 2 of IEEE NKSS Ideathon 2026 at JCER, Belgaum; presented the proposed idea to a technical panel.
- Secured department-level top ranks in the 1st, 2nd, 4th, and 5th semesters of B.E. Computer Science & Engineering, maintaining a CGPA of 8.93.
- Secured 94% in the Pre-University (Science) Board Examination and received the Best Student Award.

EXTRACURRICULAR ACTIVITIES & INVOLVEMENT

- Campus Mantri for GeeksforGeeks (2026) – Student community leadership and advocacy.
- Contributor – GirlScript Summer of Code 2026 (GSSoC 2026) – Open-source development and mentorship program.
- Contributor – Social Summer of Code 2026 (SSoC Season 5) – Open-source development program.
